## **ABOUT GENERAL INFORMATION (GI):**

### **I. Background**

Recent years, R&D and business activities are becoming increasingly global and borderless, and the securing of Intellectual Property (IP) protection is becoming an extremely important issue worldwide. IP protection is a key factor in promoting foreign investment and technology transfer, as well as for boosting a nation's industrial development. Therefore, since 1996, the Japan Patent Office (JPO) has provided vigorous support for human resource development in order to reinforce the protection of IP in developing countries. The training program in Japan is funded by the JPO, while its operation is entrusted to Japan Institute for Promoting Invention and Innovation (JIPII) and the Association for Overseas Technical Cooperation and Sustainable Partnerships (AOTS).
